

Hawaii Census 2000 General Demographic Characteristics Profiles: State of Hawaii, Education Administrative Areas, High School Complexes

Scope of Document. This document contains Census 2000 demographic characteristics profiles for Hawaii as a Federal school district, Hawaii education administrative areas (7 areas), and Hawaii high school complexes (43 areas). One page profiles are presented for each geographic area following this introductory narrative.

This document has been prepared as a contributed, public use, no-fee resource by Warren Glimpse and Proximity. The purpose of the document is to provide access to key demographic data, not available from other sources, to facilitate planning and analysis relating to Hawaii education and related programs.

Data presented in this report have been developed by aggregating Census 2000 census block level data to Hawaii education administrative areas and high school complex areas as defined for Census 2000. Boundaries for these areas were developed by the Hawaii Department of Education. These boundary data were subsequently entered into the Census 2000 TIGER cartographic database maintained by the U.S. Census Bureau. The existence of these boundaries has enabled the association of census blocks with education administrative areas and high school complex areas making the process of creating tabulations for these areas identical to any Census 2000 public school district. For more information these geographic areas and related information, refer to <http://proximityone.com/hidmi.htm>. The following text further describes the more general initiative of Proximity in developing these data nationwide.

About the Profiles. The Proximity school district Census 2000 demographic characteristics profiles have been developed to meet the needs of researchers, analysts, decisionmakers, and others who need access to detailed, current demographics for individual school districts. These data are not available from other sources. The profile is available for every U.S. public school district. Proximity provides similar profiles for all types of political and statistical geographic areas, from census block up, and may be developed for custom defined geographic areas.

Value/Benefits. Data in the profiles are of value to schools, districts, communities, resident stakeholders, business stakeholders, associations, researchers, and special interest groups. Libraries, regional organizations, and state and local agencies find the standardized set of data useful for comparing features of school districts and aggregating data to specially defined areas. Examples of ways these data benefit users include:

- Providing a better understanding of the demographic composition of the local educational programs market and the association of adjacent community areas and school districts.
- Providing the "denominator" data to assess programs or make related computations concerning health and other incidence related measures.
- Providing data required to for grant applications and certifications.
- Providing insights that facilitate improved curriculum specification and balancing to better meet population needs.
- Providing size/dimensional numbers to help make informed decisions about the growth of the enrollment in years ahead (and associated facility and staff planning and budgeting issues).
- Providing a better awareness of how education is being provided by private versus public sector.
- Providing documentation pertaining to issues that are speculative among parties involved in decisionmaking as to size and composition of various elements of the population in the service area.
- Providing entities with a regional oversight/budgetary role for multiple school districts the ability to determine relative sizes for funding and other resource allocations and to determine "share of costs" for resources distributed to a set of districts (e.g. libraries, regional service agencies, etc.)
- Providing official data needed to meet legal requirements.

Subject Matter. Profiles contain the 100-percent data, data compiled from the questions asked of all people and about every housing unit in Census 2000. Data items include sex, age, race, Hispanic or Latino, household relationship, household type, group quarters population, housing occupancy, and housing tenure. The profiles include a total of 91 population and 25 housing data items. See attached sample profile.

Unique Data. The profile format is similar to the Census Bureau Census General Demographic Characteristics Profile (not available for school districts) released in May 2001 but differs in the Proximity profile is developed directly from data contained in the Census 2000 Summary File 1 using software developed by Proximity. The Proximity profile includes data on the number of persons by single year of age for ages less than one year through 19 years of age.

Geographic Scope. Profiles are available for all states and all types of geographic areas covered in Census 2000 Summary File 1 as well as user custom defined areas. The profile may be developed for user defined geographic areas (e.g., school district attendance areas, sales territories, service areas, corridors, etc.).

The Proximity school district profile is available for school districts identified in the Census 2000 Summary File 1. No aggregate school district data are contained in Summary File 1. Proximity has aggregated census block level data to the school district area. School district data correspond to boundaries as of the 1999-2000 school year. Related maps are also available from Proximity.

Validation/Accuracy. Data in the profiles are not subject to sampling error as they are tabulations of universe data. Data in profiles have been validated by comparing the data items with the Census Bureau Summary File 1 data at the state level.

Media/Access. Profiles are normally distributed in the form of PDF's and can be delivered on the same day as ordered. Printed versions are also available. Data files with corresponding data are also available.

Related Demographic Data. National scope Census 2000 population totals are available for all U.S. school districts at no fee via the Proximity web site <http://proximityone.com/plsd.htm>. Additional Census 2000 demographic data for school districts will become available in early 2003 from the Census 2000 school district special tabulation. These data will include richer socioeconomic data such as income, employment, education and other items derived from the Census 2000 long form questionnaire.

Maps. Supplemental and more detailed map files in shapefile format may be downloaded from the Proximity web site at <http://proximityone.com/maps2000.htm>. These map files are available at no fee but registration is required. Map files may be used to prepare maps using no fee software described on the download page as well as other mapping software.

Ordering. Profiles may be ordered by contacting Proximity at (703) 256-9850. Or, profiles using a Web order form at <http://proximityone.com/register.htm>. On the register/order form, you will find a box to check to order the form and specify the district name.

Questions regarding use of this report or these data should be referred to Proximity:

About Proximity. Proximity is a business that designs, develops, implements, facilitates access to, and deploys component-based information resources to help clients integrate and use geodemographic and decision making information. Proximity was founded by Warren Glimpse, developer of the 1990 Census School District Data Book/school district special tabulation and the first set of national scope school district electronic maps. Proximity works with education agencies and other organizations to develop wide ranging school and school system infrastructure data and integrate these data into effective decisionmaking and operations.

¹ Data for subcategories not available for areas smaller than census tracts or areas for which data are derived by summing census block data.

² Other Asian alone, or two or more Asian categories; ³ Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories.

⁴ In combination with one or more of the other races listed. Subcategory number may sum to more than total because individuals may report more than one race.

Age — The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information.

Average Family Size — A measure obtained by dividing the number of people in families by the total number of families (or family householders).

Average Household Size — A measure obtained by dividing the number of people in households by the total number of households (or householders).

Average Household Size of Owner-Occupied Units — A measure obtained by dividing the number of people living in owner-occupied housing units by the number of owner-occupied housing units.

Average Household Size of Renter-Occupied Units — A measure obtained by dividing the number of people living in renter-occupied housing units by the number of renter-occupied housing units.

Census Block — Census blocks are geographic areas delineated by the Census Bureau working with local government agencies. Census blocks are statistical areas defined for use in collecting and tabulating data. The census block is the smallest geographic area for which decennial census data are tabulated. Census blocks average less than 100 persons per block. Census blocks follow physical earth surface boundaries most typically streets, water features, railroads, etc. A block location/boundary and number may change census to census. Census blocks are subservient to all political and other statistical area boundaries. Census blocks are defined through a coordinated process involving a Census Bureau geographic areas specialist assigned to the regional office and a collection of involved local planning agencies.

Census Designated Place -- Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide data for settled concentrations of population that are identifiable by name but are not legally incorporated under the laws of the state in which they are located. The boundaries usually are defined in cooperation with local or tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary. There are no population size requirements for the CDPs designated in conjunction with Census 2000.

Hawaii is the only state that has no incorporated places recognized by the U.S. Census Bureau. All places shown in the data products for Hawaii are CDPs. By agreement with the state of Hawaii, the U.S. Census Bureau does not show data separately for the city of Honolulu, which is coextensive with Honolulu County.

Each CDP is assigned a five-digit Federal Information Processing Standards (FIPS) code, based on the alphabetical order of the CDP name within each state. If CDP names are duplicated within a state and they represent distinctly different areas, a separate code is assigned to each CDP name alphabetically by primary county.

Census Tract -- Census tracts are small, relatively permanent statistical subdivisions of a county delineated by local participants as part of the U.S. Census Bureau's Participant Statistical Areas Program. The U.S. Census Bureau delineated census tracts in situations where no local participant existed or where local or tribal governments declined to participate. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of decennial census data. Census tracts cover the entire U.S. Census tracts generally have between 1,500 and 8,000 people, with an optimum size of 4,000 people. (Counties with fewer people have a single census tract.)

Census tracts are identified by a four-digit basic number and may have a two-digit numeric suffix; for example, 6059.02. Census tract numbers range from 1 to 9999 and are unique within a county or statistically equivalent entity. The U.S. Census Bureau reserves the basic census tract numbers 9400 to 9499 for census tracts delineated within or to encompass American Indian reservations and off-reservation trust lands that exist in multiple states or counties. The number 0000 in computer-readable files identifies a census tract delineated to provide complete coverage of water area in territorial seas and the Great Lakes.

Child — A child includes a son or daughter by birth, a stepchild, or an adopted child of the householder, regardless of the child's age or marital status.

Family Household (Family) — A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

Female Householder, No Husband Present — A female maintaining a household with no husband of the householder present.

Group Quarters Population — The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized: 1) the institutionalized population which includes people under formally authorized, supervised care or custody in institutions at the time of enumeration (such as correctional institutions, nursing homes, and juvenile institutions) and 2) the noninstitutionalized population which includes all people who live in group quarters other than institutions (such as college dormitories, military quarters, and group homes).

Hispanic or Latino — People who identify with the terms "Hispanic" or "Latino" are those who classify themselves in one of the specific Hispanic or Latino categories listed on the questionnaire—"Mexican," "Puerto Rican," or "Cuban"—as well as those who indicate that they are "other Spanish, Hispanic, or Latino." Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

Homeowner Vacancy Rate — The homeowner vacancy rate is the proportion of the homeowner housing inventory which is vacant for sale. It is computed by dividing the number of vacant units for sale only by the sum of owner-occupied units and vacant units that are for sale only, and then multiplying by 100. (For more information, see "Vacant Housing Unit.")

Household — A household includes all of the people who occupy a housing unit. People not living in households are classified as living in group quarters.

Householder — In most cases, the householder is the person, or one of the people, in whose name the home is owned, being bought, or rented and who is listed as Person 1 on the census questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder (i.e., Person 1).

Housing Unit — A housing unit may be a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live

separately from any other individuals in the building and which have direct access from outside the building or through a common hall.

Incorporated place -- Incorporated places recognized in Census 2000 are those reported to the U.S. Census Bureau as legally in existence on January 1, 2000, under the laws of their respective states, as cities, boroughs, towns, and villages, with the following exceptions: the towns in the New England states, New York, and Wisconsin, and the boroughs in New York are recognized as minor civil divisions for statistical purposes; the boroughs in Alaska are county equivalents for decennial census statistical presentation purposes. In four states (Maryland, Missouri, Nevada, and Virginia), there are one or more incorporated places known as "independent cities" that are primary divisions of a state and legally not part of any county. For statistical purposes, the U.S. Census Bureau may treat an independent city as a county equivalent, county subdivision, and place. Each incorporated place is assigned a five-digit Federal Information Processing Standards (FIPS) code, based on the alphabetical order of the incorporated place name within each state. If incorporated place names are duplicated within a state and they represent distinctly different areas, a separate code is assigned to each incorporated place name alphabetically by primary county in which each incorporated place is located, or if both incorporated places are in the same county, alphabetically by their legal description (for example, "city" before "village").

Institutionalized Population — The institutionalized population includes people under formally authorized, supervised care or custody in institutions at the time of enumeration. (For more information, see ["Group Quarters Population."](#))

Married-Couple Family — A family in which the householder and his or her spouse are enumerated as members of the same household.

Median Age — The median divides the age distribution into two equal parts, one-half of the cases falling below the median age and one-half above the median. This measure is rounded to the nearest tenth.

Nonfamily Household — A householder living alone or with nonrelatives only.

Noninstitutionalized Population — All people who live in group quarters other than institutions. Also included are staff residing at institutional group quarters. (For more information, see ["Group Quarters Population."](#))

Nonrelative — Any household member who is not related to the householder by birth, marriage, or adoption, including foster children.

Occupied Housing Unit — A housing unit is classified as occupied if it is the usual place of residence of the person or group of people living in it at the time of enumeration, or if the occupants are only temporarily absent; that is, away on vacation or business.

Other Relative — Any household member related to the householder by birth, marriage, or adoption, but not included specifically in another relationship category.

Own Child — A child under 18 years old who is a son or daughter by birth, marriage (a stepchild), or adoption. For 100-percent tabulations, own children consist of all sons/daughters of householders who are under 18 years of age. For sample data, own children consist of sons/daughters of householders who are under 18 years of age and who have never been married, therefore, numbers of own children of householders may be different in these two tabulations.

Owner-Occupied Housing Unit — A housing unit is owner-occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for.

Place — A place is a geographic area that is an incorporated place, consolidated city, or census designated place.

Race — The concept of race as used by the Census Bureau reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups. The racial classifications used by the Census Bureau adhere to the October 30, 1997, *Federal Register Notice* entitled, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity" issued by the Office of Management and Budget (OMB). These standards govern the categories used to collect and present federal data on race and ethnicity.

The OMB requires five minimum categories (American Indian and Alaska Native, Asian, Black or African American, Native Hawaiian and Other Pacific Islander, and White) for race. The race categories are described below with a sixth category, "Some other race," added with OMB approval. In addition to the five race groups, the OMB also states that respondents should be offered the option of selecting one or more races. If an individual could not provide a race response, the race or races of the householder or other household members were assigned by the computer using specific rules of precedence of household relationship. For example, if race was missing for a natural-born child in the household, then either the race or races of the householder, another natural-born child, or the spouse of the householder were assigned. If race was not reported for anyone in the household, the race or races of a householder in a previously processed household were assigned.

White — A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as "White" or report entries such as Irish, German, Italian, Lebanese, Near Easterner, Arab, or Polish.

Black or African American — A person having origins in any of the black racial groups of Africa. It includes people who indicate their race as "Black, African Am., or Negro," or provide written entries such as African American, Afro American, Kenyan, Nigerian, or Haitian.

American Indian and Alaska Native — A person having origins in any of the original peoples of North and South America (including Central America), and who maintain tribal affiliation or community attachment. It includes people who classify themselves as described below.

American Indian — Includes people who indicate their race as "American Indian," entered the name of an Indian tribe, or report such entries as Canadian Indian, French-American Indian, or Spanish-American Indian.

Alaska Native — Includes written responses of Eskimos, Aleuts, and Alaska Indians as well as entries such as Arctic Slope, Inupiat, Yupik, Alutiiq, Egegik, and Pribilofian. The Alaska tribes are the Alaskan Athabaskan, Tlingit, and Haida. The information for Census 2000 is derived from the American Indian Detailed Tribal Classification List for the 1990 census and was expanded to list the individual Alaska Native Villages when provided as a written response for race.

Asian — A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. It includes "Asian Indian," "Chinese," "Filipino," "Korean," "Japanese," "Vietnamese," and "Other Asian."

Asian Indian — Includes people who indicate their race as "Asian Indian" or identify themselves as Bengalese, Bharat, Dravidian, East Indian, or Goanese.

Chinese — Includes people who indicate their race as "Chinese" or who identify themselves as Cantonese, or Chinese American. In some census tabulations, written entries of Taiwanese are included with Chinese while in others they are shown separately.

Filipino — Includes people who indicate their race as “Filipino” or who report entries such as Philipino, Philippine, or Filipino American.

Japanese — Includes people who indicate their race as “Japanese” or who report entries such as Nipponese or Japanese American.

Korean — Includes people who indicate their race as “Korean” or who provide a response of Korean American.

Vietnamese — Includes people who indicate their race as “Vietnamese” or who provide a response of Vietnamese American.

Cambodian — Includes people who provide a response such as Cambodian or Cambodia.

Hmong — Includes people who provide a response such as Hmong, Laohmong, or Mong.

Laotian — Includes people who provide a response such as Laotian, Laos, or Lao.

Thai — Includes people who provide a response such as Thai, Thailand, or Siamese.

Other Asian — Includes people who provide a response of Bangladeshi, Burmese, Indonesian, Pakistani, or Sri Lankan.

Native Hawaiian and Other Pacific Islander — A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. It includes people who indicate their race as “Native Hawaiian,” “Guamanian or Chamorro,” “Samoan,” and “Other Pacific Islander.”

Native Hawaiian — Includes people who indicate their race as “Native Hawaiian” or who identify themselves as “Part Hawaiian” or “Hawaiian.”

Guamanian or Chamorro — Includes people who indicate their race as such, including written entries of Chamorro or Guam.

Samoan — Includes people who indicate their race as “Samoan” or who identified themselves as American Samoan or Western Samoan.

Other Pacific Islander — Includes people who provided a write-in response of a Pacific Islander group such as Tahitian, Northern Mariana Islander, Palauan, Fijian, or a cultural group such as Melanesian, Micronesian, or Polynesian.

Some Other Race — Includes all other responses not included in the “White,” “Black or African American,” “American Indian and Alaska Native,” “Asian,” and the “Native Hawaiian and Other Pacific Islander” race categories described above. Respondents providing write-in entries such as multiracial, mixed, interracial, or a Hispanic/Latino group (for example, Mexican, Puerto Rican, or Cuban) in the “Some other race” category are included in this category.

Two or More Races — People may have chosen to provide two or more races either by checking two or more race response check boxes, by providing multiple write-in responses, or by some combination of check boxes and write-in responses. The race response categories shown on the questionnaire are collapsed into the five minimum race groups identified by the OMB, and the Census Bureau “Some other race” category. For data product purposes, “Two or more races” refers to combinations of two or more of the following race categories:

- White
- Black or African American
- American Indian and Alaska Native
- Asian
- Native Hawaiian and Other Pacific Islander
- Some other race

Coding of Write-In Entries — During 100-percent processing of Census 2000 questionnaires, subject-matter specialists reviewed and coded written entries from four response categories on the race item — American Indian or Alaska Native, Other Asian, Other Pacific Islander, and Some other race — for which an area for a write-in response was provided. The Other Asian and Other Pacific Islander response categories shared the same write-in area on the questionnaire.

Rental Vacancy Rate — The proportion of the rental inventory which is vacant for rent. It is computed by dividing the number of vacant units for rent by the sum of the renter-occupied units and the number of vacant units for rent, and then multiplying by 100.

Renter-Occupied Housing Unit — All occupied housing units which are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter occupied. Housing units in “continuing care” or life care facilities are included in the “rented for cash rent” category.

School District -- School districts are geographic entities designated by the corresponding state education agency as being chartered and responsible for administering public educational services under guidelines as established by the state. The Census Bureau obtains the boundaries and names for school districts from state education agencies. For Census 2000, the Census Bureau tabulated data for three types of school districts: elementary (typically grades ranging K-8), secondary (typically grades ranging 7-12), and unified (typically grades ranging K-12). For Census 2000, school district boundaries are current as of the 1999-2000 school year. Each school district is assigned a five-digit code that is unique within state. School district codes are assigned by the Department of Education.

Seasonal, Recreational, or Occasional Use Housing Unit — Seasonal, recreational, or occasional use housing units include vacant units used or intended for use only in certain seasons, for weekends, or other occasional use throughout the year. Interval ownership units, sometimes called shared ownership or time-sharing condominiums are included in this category. (For more information, see ["Vacant Housing Unit."](#))

Sex — Based on self-reporting of gender. Either male or female.

Spouse — A person who is married to and living with the householder. This category includes people in formal marriages, as well as people in common-law marriages.

Tenure — All occupied housing units are classified as either owner occupied or renter occupied. A housing unit is owner occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for. All occupied housing units which are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter occupied.

Traffic Analysis Zone. A traffic analysis zone (TAZ) is a special area delineated by state and/or local transportation officials for tabulating traffic-related data- especially journey-to-work and place-of-work statistics. A TAZ usually consists of one or more census blocks, block groups, or census tracts. Each TAZ is identified by a six-character alphanumeric code that is unique within county or statistically equivalent entity.

Vacant Housing Unit — A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by people who have a usual residence elsewhere are also classified as vacant. (For more information, see ["Housing Unit."](#))

ZIP Code Tabulation Area (ZCTA) --- A ZIP Code tabulation area is a statistical geographic entity that approximates the delivery area for a U.S. Postal Service five-digit or three-digit ZIP Code. ZCTAs are aggregations of census blocks that have the same predominant ZIP Code associated with the addresses in the Census Bureau's Master Address File (MAF). Three-digit ZCTA codes are applied to large contiguous areas for which the U.S. Census Bureau does not have five-digit ZIP Code information in its MAF. ZCTAs do not precisely depict ZIP Code delivery areas, and do not include all ZIP Codes used for mail delivery. The Census Bureau has established ZCTAs as a new geographic entity for Census 2000.

DERIVED MEASURES

Average — See "Mean."

Interpolation — Interpolation frequently is used in calculating medians based on interval data and in approximating standard errors from tables. Linear interpolation is used to estimate values of a function between two known values. This is the form of interpolation used to calculate median age.

Mean — This measure represents an arithmetic average of a set of values. It is derived by dividing the sum (or aggregate) of a group of numerical items by the total number of items in that group. For example, average family size is obtained by dividing the number of people in families by the total number of families (or family householders). (Additional information on means and aggregates is included in the separate explanations of many of the population and housing subjects.)

Median — This measure represents the middle value (if n is odd) or the average of the two middle values (if n is even) in an ordered list of n data values. The median divides the total frequency distribution into two equal parts: one-half of the cases falling below the median and one-half above the median. (See also "Interpolation.")

Percentage — This measure is calculated by taking the number of items in a group possessing a characteristic of interest and dividing by the total number of items in that group, and then multiplying by 100.

Rate — This is a measure of occurrences in a given period of time divided by the possible number of occurrences during that period. Rates are sometimes presented as percentages.
